9. Specific information/action items for ISO/TC 67 :

- Concern: management of the TC67 WG 14 project groups requires special attention because of the large number of experts nominated to participate in the growing number of project groups.
- Concern: growth in definitions for about +/- similar subjects.
- Cooperation with CEN TC234 in order to create one common revised umbrella type pipeline standard is realized by means of a joint task force.
- Australia is considering to become P member in due course.
- Progress during last year excellent:
published two standards in 2003 (CP on land in Nov and Fittings in Dec),
published one standard so far in 2004 (CP offshore) and expect
to publish two more standards in 2004 (Testing procedures for mechanical connectors in Oct and Flanges in Dec).
